

OXYGEN AND WATER ARE
THE SOURCES OF LIFE

nectaramante

nectaramante

NECTARAMANTE is a composite word that is derived from Latin words, 'NECTAR' which means 'the drink of the god' who promises eternal youth and 'amante', a 'lover'.

NECTARAMANTE is a premium oxygen water brand that has dissolved oxygen, the source of life, in a highly concentrated state.

If the oxygen deficiency in the human body persists, our health and happiness disappear in an instant.

NECTARAMANTE's oxygen water is highly enriched oxygen water that fills a need of oxygen in body, and it will always protect our health and happiness.

The functions of our lungs and hearts gradually deteriorate with age. As a result, our body will change in to a low-oxygen state. Therefore, **maintaining sufficient oxygen in our bodies** is the key to good health.

Inhibition of cancer cell proliferation, generation and growth

Brain activation

Relaxation and alleviation of depression

Boosting immune system

Decomposition of fat

Improvement in ageing

The content above is excerpted from national and international journals and papers, broadcasting, media, and books.

CERT' OF PATENT Reg. No. 10-0000725 | CERT' OF TRADEMARK Reg. No. 40-0000506 | CERT' OF DESIGN Reg. No. 30-0000763 | CERT' OF DESIGN Reg. No. 30-0000679

Oxygen is absorbed **APPROXIMATELY 10 TIMES** faster into our bodies when consumed in water.

	Oxygen saturation in blood (Degraded to less than 90%)	White blood cells and hemoglobin	The amount of oxygen absorbed by the liver
Pulmonary respiration	Takes two hours to approximately 95%	No change	Approximately 8%
Potable oxygen water	Reaches approximately 96.7% immediately after drinking	A large increase in the number of white blood cells and hemoglobin	Approximately 43%

Dr. Maria Zoital / Literary Review of oxygen Therapy (Jun,1992)

Comparisons of dissolved oxygen level in water

The amount of dissolved oxygen content in water may vary with different methods of water purification and the temperature.

Purified water
Approximately 4ppm

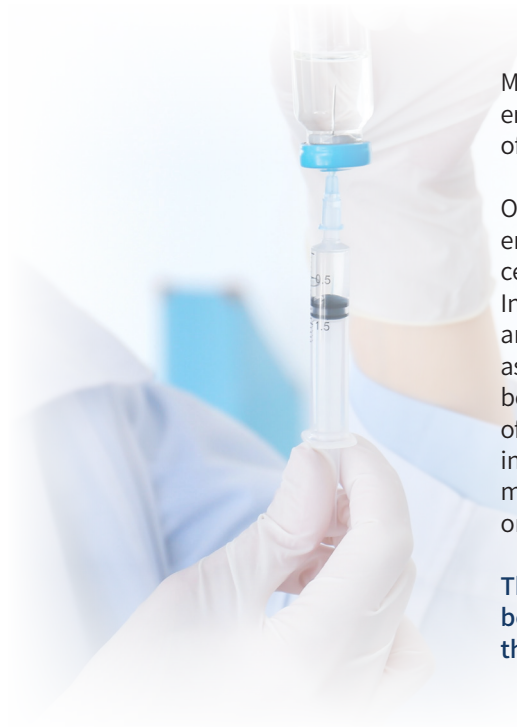

Natural water
Approximately 8ppm

NECTARAMANTE
Approximately 80ppm

It is measured that NECTARAMANTE's high enriched oxygen water contains **approximately 20 times more** dissolved oxygen than the purified water.

OXYGEN is a NATURAL ANTI-CANCER VACCINE that inhibits the production, propagation, and growth of cancer cells.

Maintaining a sufficient level of oxygen saturation in our bodies not only enhances immunity and blood circulation, but also it boosts the activity of normal cells, which will greatly help achieve a healthy and happy life.

On the contrary, the deficit of oxygen in our bodies will change the environment within us to which that is optimal conditions for cancer cell proliferation.

In other words, as our bodies create the environment optimized for an anaerobic metabolic activity, the immunity will constantly decrease, as well as the activity and growth of normal cells would deteriorate and become extinct due to the continuous generation of excessive amounts of active oxygen, toxins, and body wastes. As a result, inflammation occurs in some cells, and our health deteriorates by repeating the process of mutating, producing, and proliferating few of these cells into the cancer ones.

Therefore, maintaining sufficient and stable oxygen saturation in our bodies is the most important first step in protecting our health, and thus happiness.

The content above is excerpted from national and international journals and papers, broadcasting, media, and books.

The secret of health is **MAINTAINING SUFFICIENT OXYGEN SATURATION** in the body.

Dr. Otto Warburg

Cancer is caused by a lack of oxygen requirements.

- Nobel Prize in Physiology and Medicine (1931, 1944)

Dr. Hideyo Noguchi

The cause of all illnesses begins with a lack of oxygen(Hypoxia).

- Eight nominations for the Nobel Prize in Physiology and Medicine (1913-1915, 1920-1921, 1924-1927)

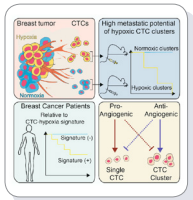

Dr. Gregg L. Semenza
(Prof. Johns Hopkins University of medicine)

Dr. Peter J. Ratcliffe
(Prof. Oxford University, John Radcliffe Hospital)

Dr. William G. Kaelin Jr.
(Prof. Harvard University of medicine, Dana-Farber Cancer Institute)

By identifying the adaptation process of cells according to oxygen concentration, They have established a treatment method for diseases related to oxygen concentration in blood.

- Nobel Prize in Physiology and Medicine (2019)

Dr. Nicola Aceto
(Prof. University of Basel)

Increase in intratumor hypoxia leads to accelerated metastasis.

- Journal : Cell reports (2020)

Dr. Stephen A. Levine
Parris M. Kidd

Oxygen plays a pivotal role in the proper functioning of the immune system.

- [Antioxidant Adaptation] (1985)

Dr. A. Pakdaman

Lack of oxygen triggers irregular, disturbed DNA syntheses.

- First Development of Oxygen Water Treatment
- The Manfred Koehnlechner Prize (1993) by the German Research Foundation in Munich

OXYGEN RESEARCH
